METHODOLOGICAL INFORMATION AND CONCEPTS

DEMOGRAPHY

Live births: Upon occurrence of each live birth at the hospitals, Centro Hospitalar Conde S. Januário and Hospital Kiang Wu send corresponding records to the Statistics and Census Service. In addition, the Civil Affairs Registry send complementary information to the Statistics and Census Service after the registration of each live birth.

Deaths, perinatal deaths and fetal deaths: The information is based on the duplicates of doctor certificates of deaths and perinatal deaths, provided by the Civil Affairs Registry. The coding and classification of the causes of deaths are performed by the Health Bureau.

Marriages: The information is obtained from the records of marriage registration provided by the Civil Affairs Registry.

Immigrants and persons authorized to reside in Macao: The Statistics and Census Service processes and publishes the data supplied by the Public Security Forces Bureau.

All the above information refers to the actual date of event, except for that on marriages, which refers to the date of registration.

Persons authorized to reside in Macao: Collection of the information dates back to 1981.

Legal immigrants from Mainland China: The data disseminated date back to 1984.

Non-resident workers: The Statistics and Census Service provides relevant data since 1988.

CONSUMER PRICE INDEX

Consumer Price Index (CPI) is an economic indicator derived from the results of 2 surveys: Household Budget Survey, conducted between September 2002 and September 2003 to obtain the consumption pattern of households; and a continuous Consumer Price Survey to obtain retail prices of different goods and services.

CPI reflects the price change of a fixed “basket” of representative goods and services consumed by households.

WHOLESALE PRICE OF FRESH FOOD

Wholesale price is the price at which a wholesaler directly trades a certain quantity of merchandise to a retailer. The information in the survey of fresh food wholesale price is obtained from the wholesalers in Nam Yue Wholesale Market and areas around Rua do Teatro as well as Rua da Tercena. Wholesale prices of vegetables, live poultry, eggs and fresh fruits are regularly recorded from them. The same price information of livestock and rice is collected from major wholesalers in Macao.

RETAIL PRICE OF FRESH FOOD

Retail price is the price at which a retailer sells the merchandise to a final consumer. The source of the retail price of fresh food comes from the Price Survey of Consumer Price Index.

EXTERNAL TRADE

1. Data collection

- 1.1. The external trade statistics are based on information given by the importers and exporters in the trade licenses and declarations.
- 1.2. The Macao Customs Services is responsible for ensuring the information written on the trade licenses and declarations corresponds to the actual goods.
- 1.3. Statistical copies of the trade licenses and declarations are sent to the External Trade Statistics division of the Statistics and Census Service by the Macao Customs Services, the next day after each external trade operation.

2. Trade Type

The major trade types in this publication are as follows:

- 2.1. Imports: The entry of any commodities into the territory, except re-imports and transit.
- 2.2. Exports: The outgoing from the territory of any commodities, except temporary exports and transit.
 - 2.2.1. Domestic exports: The outgoing from the territory of any commodities with the origin of Macao.
 - 2.2.2. Re-exports: The outgoing from the territory of any commodities previously imported, without any transformation or even with transformation, but do not obtain the origin of the territory.

3. Commodity classification

Classifications adopted in this publication are as follows:

- 3.1 “Standard International Trade Classification, Rev.3 – SITC Rev.3” is a nomenclature drafted by the United Nations for international comparison of trade statistics;
- 3.2 “Classification by main groups of merchandises” is established with reference to the Nomenclature for the external trade of Macao/Harmonized system launched on January 1, 1989 for analyzing the structure of exported goods.

4. Country of origin and Country of destination

- 4.1 Country of origin: Imports are recorded according to the country of origin, i.e. the country or territory where the agricultural produce was grown, the minerals were mined and manufactured articles were manufactured either wholly or partly. If partly, it is considered that the country or territory of origin is the country or territory responsible for the last phase of the manufacturing operation before the merchandise takes its final form. Repacking, reclassification and mixing are not considered as a transformation operation.
- 4.2 Country of destination: Exports are recorded according to the country of destination, i.e. the final country or territory to which the goods are delivered, whether or not the transports have been interrupted, and without the commercial transaction in the intermediate country or territory.

5. Value

- 5.1. The imports and exports values are presented in MOP thousand.
- 5.2. The imports values refer to the "Cost, insurance and freight (c.i.f.)" value which represents the cost of the goods on arrival in Macao including insurance, freight, commissions and all other costs.
- 5.3. The exports values refer to the "Free on board (f.o.b.)" value which represents the selling price of the goods to the customer abroad, including local transportation costs, local insurance charge, documentation fees, commissions, etc.

TOURISM

Available rooms – Total number of guestrooms less those occupied by establishment personnel, under repair or renovation, and used for other purposes.

$$\text{Occupancy rate} = \frac{\text{Rooms occupied by guests}}{\text{Available rooms}} \times 100$$

$$\text{Average length of stay} = \frac{\text{Total length of stay of overnight guests}}{\text{Checked-in guests}}$$

CONSTRUCTION

Extension of buildings: It is the work performed on existing buildings to increase the number of floors (vertical extension) or the surface area of floors (horizontal extension) .

Gross floor area: The sum of the area of each floor of the building measured to the outer surface of the outer walls including the area of the lobbies, stairs, lifts landings and communal spaces.

Base area: It is the land area occupied by the building.

Apparent cement consumption: It is the total quantity of cement imported (except clinker cement 《clinker》) and cement sold by local manufacturer.

Building: It is an independent structure with one division or more, roofed and delimited by exterior or interior walls. In construction statistics, only formal buildings are included.

Classification of building by end-use: End-use of a building is determined by the activity which occupies 70% or more of the gross floor area of the building.

Residential: Not less than 70% of the gross floor area of the building is intended for residential purpose.

Residential and others: At least 50% but less than 70% of the gross floor area is intended for residential purpose.

Commercial and Offices: Not less than 70% of the gross floor area of the building is intended for commercial or office purpose.

Industrial: Not less than 70% of the gross floor area of the building is intended for industrial purpose.

Other uses: Not less than 70% of the gross floor area of the building is intended for other uses.

Unit: Division(s) or annex of a permanent building. Each unit has independent entrance of access to the common area of the building, can be legally registered with the property registry and can be independently transacted.

New building: It refers to those building units entitled to property tax exemption or those with completion year of construction equal to or less than 4 years, as stipulated in a) and b) of item 1 under article 9 of the Regulation of Urban Property Tax currently in force, which prescribes the following as new building:

- 1) In Macao Peninsula, residential and/or commercial units built up to 4 years and industrial units built up to 5 years.
- 2) In Islands, the residential and/or commercial units built up to 6 years and industrial units built up to 10 years.

Old building: Old building includes the following:

- 1) In Macao Peninsula, the residential and/or commercial units built more than 4 years and industrial units built more than 5 years.
- 2) In Islands, the residential and/or commercial units built more than 6 years and industrial units built more than 10 years.

Intermediate transfer of title: The transfer of immovable property whose full transfer of ownership has not completed. With fiscal effects, payment of stamp duty tax of 0.5% for transfer of property produces legal effects for the respective transaction of the residential unit of a building.

ENERGY

Gross production of electricity: Total production of electricity before the deduction of any consumption or losses.

Electricity plant consumption and losses: Electricity consumption and losses within the plant, auxiliary facilities and major transformers during electricity generation.

Net production of electricity: It is the balance of gross production of electricity, less the electricity plant consumption and losses.

Imports: Energy imported in primary or by-product form, excluding direct transit.

Exports: Energy sold abroad.

Gross available supply: It is the sum of net production, net imports and local purchases of electricity.

Consumption of electricity: It is the sum of sales, free supply and producers' own consumption of electricity.

Sales: Electricity sold by CEM to the final consumers.

a Values as at the end of the period; unit = MOP million

b MOP per 100 units of foreign currency - annual and monthly averages

c Starting from January 2001, the definition of M1 has been revised. Savings Deposits are reclassified as Quasi-Monetary Liabilities (QML), while M1 includes only Currency in Circulation and Demand Deposits.

d In January 1999, the designation of the single European currency was changed from "ECU" to "EURO"
