### Methodology

Compilation of the 2008/2009-based CPI is based on the consumption pattern derived from the Household Budget Survey (HBS) 2007/2008. The Composite CPI reflects the impact of price changes on the general population, while the CPI-A and CPI-B reflects the impact of price changes on households in different expenditure ranges. The CPI-A relates to about 50% of the households, which have an average monthly expenditure of MOP6,000 to MOP18,999; the CPI-B relates to about 30% of the households, which have an average monthly expenditure of MOP19,000 to MOP34,999.

The CPI-basket contains 709 items of goods and services, of which an average of 11,747 prices are collected from a total of 1,113 outlets every month.
