Printed by: DSEC

It is international practice for most countries and territories to carry out population census once every ten years. From 23 August to 1 September 2001, the Macao Special Administrative Region conducted the fourteenth Population Census and the fourth Housing Census. This was also Macao's first population census in the new millenium and after its Handover to China.

Census 2001 was successfully concluded with the full support of the citizens, co-operation of public and private institutions, schools and associations. In addition, participation of nearly 3,200 university and secondary school students who helped in the data collection process, and the dedicating staff of the Statistics and Census Service (DSEC).

In December 2001 and April 2002, DSEC published the preliminary results and the socio-demographic characteristics of the population respectively. This publication contains the global results of Census 2001; it includes summary findings on the principal characteristics and evolution of the population, together with detailed statistical tables.

We would like to extend our profound gratitude to the public and private entities, associations and individuals for their supports and co-operations. All comments and suggestions that will improve the quality of our works are highly appreciated.

1. Objectives

Census 2001 was the fourteenth Population Census and the fourth Housing Census in Macao. According to international recommendations, most countries or territories conduct population census once every ten years. Through this extensive statistical operation, we are able to obtain comprehensive, accurate and up-to-date information about the population and housing conditions of Macao. Census information is vital to the Government of the Macao SAR in policy formulation, viz. education, housing, transport, health care, social services and so on. For instance, information on age and sex distribution serves as benchmark data for the compilation of population estimates. On the other hand, Census data provides invaluable reference to industrial and business enterprises, associations and academic institutions.

2. Census moment and data collection period

In Census 2001, the census moment was fixed at 3 a.m. on 23 August 2001; the data collection period ran from 23 August to 1 September 2001. Due to the specific customs and traditions, the marine population Census was conducted before the Chinese New Year of 2001, from 17 to 23 January.

3. Scope and coverage

Census 2001 covered the entire Macao Special Administrative Region, which included all individuals and types of quarters for housing or other purposes. However, it excluded military personnel and facilities of the People's Liberation Army of the People's Republic of China stationed in Macao.

4. Data collection method

Census 2001 involved the participation of nearly 3,200 university and secondary school students, together with more than 100 DSEC staff who were assigned to 18 different enumeration centres in Macao. Two types of questionnaires were used, viz. short-form and long-form, to ensure a complete enumeration of the population and their basic characteristics whilst other detailed information was obtained by sampling.

Four-fifths of the living quarters in Macao Peninsula and Taipa Island were selected to answer the short-form; the questionnaires were mailed to the households for self-enumeration. During the data collection period, census enumerators would visit these households, to collect or assist them in filling out the forms. The remaining one-fifth received a notification letter and enumerators would interview them with the long-form. In addition, all living quarters in Coloane Island were required to answer the long-form.

The short-form collected basic information such as the number of persons, sex, place of birth, date of birth, place of usual residence, etc.

In addition to the basic questions in the short-form, the long-form collected detailed information on the socio-economic characteristics of the population, i.e. descent, nationality, place of previous residence, educational attainment, status in employment, earnings from employment and place of work.

5. Sampling method

With systematic sampling method, the sample size consisted of one-fifth of the living quarters in Macao Peninsula and Taipa Island. In order to minimize biases caused by the coincidence between sampling intervals and location of the living quarters, the selection process began with seven random starts; based on the living quarters selected systematically, seven sub-samples were created. This method also simplified the calculation of the standard errors of the sample estimates.

6 Inference

To avoid inconsistency between the sample estimates collected by the long-form and the data obtained from full enumeration by the short-form, results of the short-form were used as control data for the adjustment of the statistics of the samples.

Formula for sample estimates is given as follows:

$$\hat{Y} = \sum_{i}^{k} \hat{Y}_i = \sum_{i}^{k} y_i * \frac{N_i}{n_i}$$

where,

N_i – represents the total population in *i-th* cross-tabulation of age / sex / place of birth / parish, *(i=1, 2, …k)*;

n_i – represents the sample total in *i-th* cross-tabulation of age / sex / place of birth / parish;

y_i – represents the sample count of the population with a certain characteristics, in *i-th* cross-tabulation of age / sex / place of birth / parish;

$\hat{Y}_i$ – represents the estimate of the total population with a certain characteristics, in cross-tabulation of age / sex / place of birth / parish;

$\hat{Y}$ – represents the estimate of the total population with a certain characteristics.

7. Quality control

All of the workers who participated in data collection of Census 2001 were well equipped with proper training; before they were selected, they had to pass a series of selection procedures and tests.

For the quality control process, some of the housing units were re-interviewed by supervisors, to collect basic information from the households and to evaluate the quality of the census enumerators. All complete questionnaires were verified by the checkers in the enumeration centres and immediately sent back to DSEC for data processing by using the "Optical Character Recognition" (OCR) technique. The data would proceed for consistency and logical checks by computers, to ensure there were no omissions and errors in the questionnaires.

Upon completion of the data collection of Census 2001, a 7-day "Post Enumeration Survey" (PES) was conducted from 7 to 13 September 2001. To evaluate the Census coverage and quality of the data collected, 5% of the living quarters were selected for coverage evaluation and 5% of the interviewed households were re-interviewed for quality control. Results from PES indicated that the quality of this Census operation complied with international standards.

8. Definition of terms

Resident population	-	Sum of usual residents and mobile residents.
Usual resident	-	Person who had stayed in Macao for at least 3 months during the 6 months before or after the reference date.
Mobile resident	-	Person who had stayed in Macao for at least one month but less than 3 months during the 6 months before or after the reference date.
Age	-	Number of complete years a person has passed since birth on the reference date.
Place of birth	-	Country or territory where a person was born.
Descent	-	Blood relationship of a person formed naturally by birth.
Nationality	-	Citizenship of a country granted to a person.
Place of usual residence	-	If a person had stayed in Macao for more than 3 months during the 6 months before or after the reference date, his/her place of usual residence was Macao. Otherwise, it was the place where he/she had stayed for more than 3 months during the 6 months before the reference date.
Place of previous residence	-	Country or territory outside Macao where a person had resided for at least 6 months before making Macao his/her place of usual residence.
Total years of residence in Macao	-	Total number of complete years for which a person had established his/her usual residence in Macao on the reference date. Any period of continuous absence from Macao for six months or more had to be deducted in reckoning the period.
Always in Macao	-	Situation in which a person who never leaves Macao continuously for 6 months or more since birth.
Usual language	-	The language a person frequently used at home.
Educational attainment	-	The highest level of education successfully completed in formal education on the reference date. Persons who had not completed pre-primary education are grouped under "No schooling".

Formal education	-	Systematic courses organized for children and youths, covering from kindergarten to tertiary education.
School attendance	-	The process of acquiring formal education, at any levels, in an educational institution by a person aged 3 or above.
Marital status	-	Status as regarded by an individual, which includes legal marriage, de facto marriage and cohabitation.
Economic activity status	-	The relationship between an individual and any economic activity he/she involved. It is divided into two groups, namely, active population and inactive population.
Active population	-	Total number of people aged 14 and above who were available to participate in the production of goods and services during the reference period. It comprises employed population and unemployed population.
Employed population	-	Total number of people aged 14 and above who had worked at least 1 hour during the reference period, for pay, profits or family gains, in cash or in kind.
Unemployed population	-	Total number of people aged 14 and above during the reference period with all of the following conditions: - Not having a job or any formal job attachment to an employer; - Available for work with remuneration or running own business; - Seeking work during the last 30 days.
Inactive population	-	Total number of people who were not considered as active population during the reference period; and did not satisfy the conditions to be classified as employed or unemployed. Inactive population Includes: Persons aged below 14, students, home-makers, persons permanently incapable to work, retired persons, people lived on rental income and voluntary workers.
Status in employment	-	Status of a working individual in his/her occupation during the reference period. It is distinguished into: employer, own-account worker, employee and unpaid family worker.

Occupation	-	The set of tasks or duties performed by a person during the reference period. It is classified according to the "Classification of Occupations of Macao" (COPM).
Main employment	-	The employment that occupied most of the working time of a person during the reference period. If this criterion is not applicable, it refers to the employment that generates the highest earnings
Industry	-	The economic activity carried out by a person, an enterprise or an establishment during the reference period. It is classified according to the "Classification of Economic Activities of Macao – Revision 1" (CAM – Rev. 1).
Employment earnings	-	For employees, it is the gross amount received (before any deduction) in cash during the reference period, on a regular basis, by the hours of work or job done. For employers and own-account workers, it is the amount of gross production minus expenditure and depreciation.
Total employment earnings	-	Total earnings a person received from all employment during the reference period.
Household	-	Persons who make common provision for food and other essentials for living, they need not all to be related to one another. A person living alone is considered as a household. A household may occupy part or all of a living quarter.
Head of the household	-	Person aged 16 and above and acknowledged by other member(s) in the same household as the representative.
Relationship with the head of the household	-	The relationship of each household member to the household head.
Family nucleus	-	A family nucleus was a couple without children or with one or more never married child(ren) or a single parent (either father or mother) with one or more never married child(ren).

Household composition	-	It is derived from the number of family nuclei and the relationship between other household members. The categories are as follows: One-person household - A household with only one person. Household with one unextended nuclear family - A household comprising one family nucleus without other related persons. Household with one extended nuclear family - A household comprising one family nucleus with other related persons. Household with multi-nuclear families - A household comprising two or more family nuclei whose members may or may not be related. Household with related persons forming no nuclear family - A household comprising related persons who do not form any family nucleus. Unrelated persons may be included. Household with unrelated persons - A household comprising unrelated persons.
Disability	-	Congenital or acquired physical, mental, intellectual or psychological deficiency and/or impairment that hinder a person's capability from exercising normal daily activities according to his/her age, sex, general social and cultural standards.
Living quarter	-	An area that is structurally separated with independent entrance for the purpose of human habitation, including quarter that is built or converted for human habitation and, during the reference period, not used entirely for other purposes. It also includes quarter that is not designated for habitation, but during the reference period, is used for human habitation. Living quarter is classified as follows: - Domestic living quarter. - Collective living quarter.

Domestic living quarter	-	Non-collective living quarter occupied by one or more households for habitation. Domestic living quarter includes the following types: - Conventional living quarters (e.g. living quarters in residential buildings and quarters inside industrial and commercial buildings that are used entirely for human habitation) - Temporary living quarters (e.g. squatter huts, immovable boat-houses) - Conventional living quarters not solely used for habitation (e.g. garage, care-taker's room, warehouse, office and factory used for habitation) - Mobile living quarters (e.g. boats or vessels, caravans) - Other living quarters not elsewhere classified
Collective living quarter	-	Living quarter that occupies one or more buildings that is managed by a specific organization to accommodate a group of people. Collective living quarter includes the following types: - Hotels and similar establishments - Institutions - Staff quarters - Camps - Other collective living quarters
Usable floor area of living quarter	-	Sum of all usable areas of rooms and divisions not exclusively used for commercial purposes, it is measured from the interior walls of the living quarter.
Division	-	Space within a living quarter with a minimum area of 4 m^2 (43 ft^2) and separated by walls or partitions of at least 2 meters high.
Living room	-	Division such as sitting room, dining room or room for similar purposes. The number of living room is counted according to its practical use.

Room	-	Division in a living quarter that is not exclusively used for commercial purpose, including bedroom, study room, etc.
Tenure of the living quarter	-	The legal status of a living quarter held by a household. Tenure of the living quarter includes the following categories: - Owner-occupier - Provided by employer - Sole tenant - Main tenant - Co-tenant - Sub-tenant - Others
Rent	-	The monthly amount paid by a household for occupying a part or whole of a living quarter.
Mortgage	-	The amount of monthly loan repayment made to a bank or similar institution by owner-occupiers, to redeem the living quarter they owned.
Parking spot for automobile at night	-	The place where households put their cars at night. Included: - Public car-park – Free or charged parking space in public car-park where no user restrictions applied. - Private car-park – Parking that is restricted to specific groups of users (e.g. owners or tenants of parking space in residential buildings). - Street parking – Free or charged parking space in streets.
Present population	-	Total number of people in Macao at the census moment, regardless if Macao was their usual place of residence.

10. Lists of classifications

Classification 1

Census 2001 - Classification of Industry

Section	Sector	Industry
A	Primary sector	Agriculture, farming of animals, hunting and forestry
B	Primary sector	Fishing
C	Secondary sector	Mining and quarrying
D	Secondary sector	Manufacturing
E	Secondary sector	Electricity, gas and water supply
F	Secondary sector	Construction
G	Tertiary sector	Wholesale and retail trade, repair of motor vehicles, motorcycles and personal and household goods
H	Tertiary sector	Hotels, restaurants and similar activities
I	Tertiary sector	Transport, storage and communications
J	Tertiary sector	Financial intermediation
K	Tertiary sector	Real estate, renting and business activities
L	Tertiary sector	Public administration, defense and compulsory social security
M	Tertiary sector	Education
N	Tertiary sector	Health and social welfare
O	Tertiary sector	Other community, social and personal services
P	Tertiary sector	Households with employed persons
Q	Tertiary sector	International and extra-territorial organizations and bodies

Note: The classification of industry used in Census 2001 was based on the "Classification of Economic Activities of Macao – Revision 1" (CAM-Rev.1).

Classification 2

Census 2001 - Classification of Occupations

Category	Occupation
Group 1	Legislators, senior officials of government and associations, directors and managers of companies
Group 2	Professionals
Group 3	Technicians and associate professionals
Group 4	Clerks
Group 5	Service and sales workers
Group 6	Skilled workers of agriculture and fishery
Group 7	Craft and similar workers
Group 8	Plant and machine operators, drivers and assemblers
Group 9	Unskilled workers

Note: The classification of occupations used in Census 2001 was based on the "Classification of Occupations of Macao" (COPM).

Classification 3

Census 2001 – Classification of Fields of Study

Field of study	Content
Education	Teacher training and education science
Humanities and arts	Language, history, philosophy, religion and theology, fine arts, performing arts, graphic and audio-visual arts, design
Social science, business and law	Economics, sociology, psychology, human behaviour science, journalism and information, administration and business, law
Science	Biology, botany, astronomy, physics, chemistry, mathematics and statistics, computing
Engineering, manufacturing and architecture	Mining, electronics, telecommunications, manufacturing, architecture and building, mechanics, energy and chemical engineering
Medicine	Anatomy, epidemiology, cytology, medicine pharmacy, nutrition
Others	Agriculture, forestry and fishery, veterinary, social services, transport services, environmental protection, security services

III. Comparison of principal Census results 57

I. Resident population

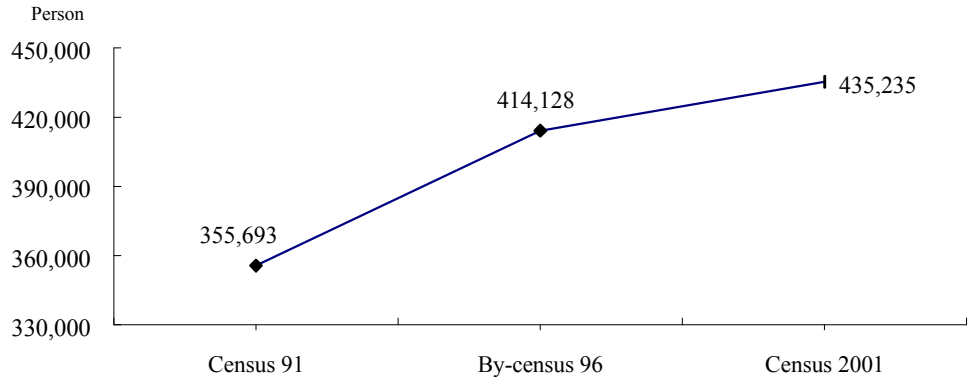

1 General demographic characteristics

1.1 Population size

Census 2001 showed that the Macao resident population in late August 2001 was 435,235. Among them, 414,047 were usual residents and 21,188 were mobile residents.

In comparison with Census 91, resident population increased by 22.4%, with an average annual growth rate of 2.04% over the past decade. Compared with by-census 96, the average annual growth rate was 1.0% during the past 5 years, representing a slow-down in population growth.

Graph 1: Resident population (1991-2001)

1.2 Sex and age structure

Among the resident population, 208,865 (48%) were males and 226,370 (52%) were females. The excess of female over the male population was due to the high proportion (over 70%) of female in more than 20,000 non-resident workers; furthermore, female accounted for over 60% of the legal immigrants to Macao.

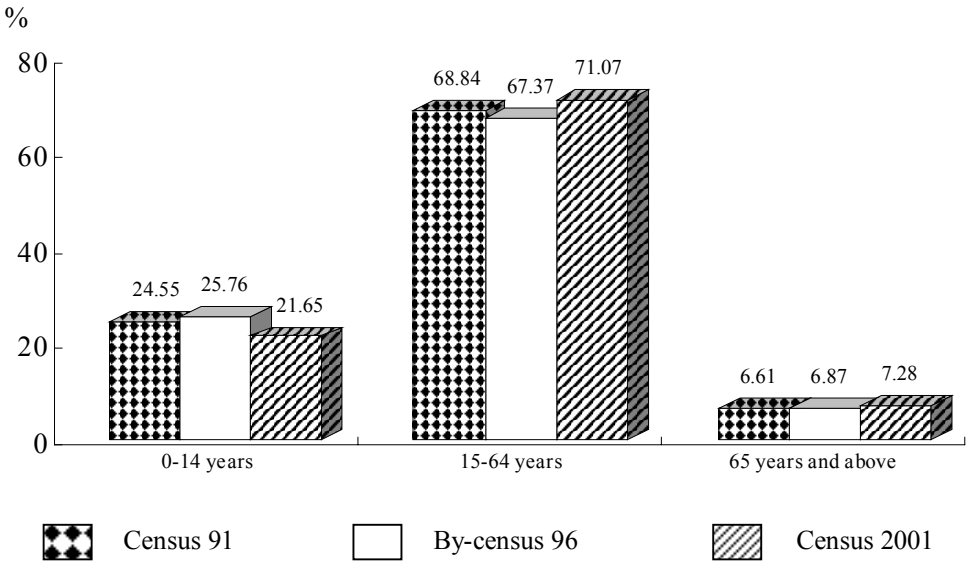

Table 1: Resident population by sex (1991-2001)

Persons

Sex \ Year	1991	1996	2001
Total	355,693	414,128	435,235
M	172,492	199,257	208,865
F	183,201	214,871	226,370

The population continued to grow old as a result of the decline in fertility rate and the increase in life expectancy over the past 10 years. The median age rose from 28.8 in Census 91 to 33.3 in Census 2001. According to the results of Census 2001, population aged 0-14 took up 21.6% of the total, dropped 2.9 percentage points compared with Census 91. The proportion of residents aged 65 and above was 7.3%, increased by of 0.7 percentage point over the last Census.

Graph 2: Resident population by age (1991-2001)

With the decrease in residents aged 0-14 and increase in those aged 65 years and above; the child dependency ratio, the percentage of residents aged 0-14 per 100 residents aged 15-64, dropped from 35.7% in Census 91 to 30.5% in Census 2001. On the contrary, the elderly dependency ratio, the percentage of residents aged 65 and above per 100 residents aged 15-64, increased from 9.6% in Census 91 to 10.2% in Census 2001.

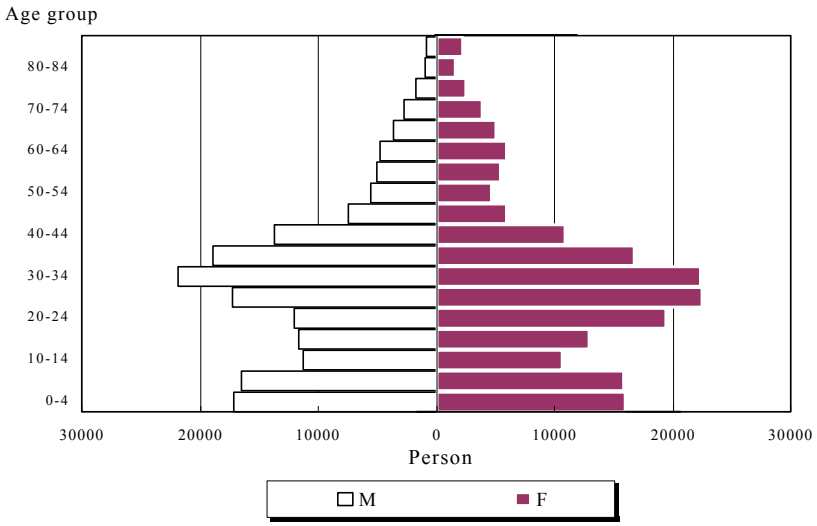

Table 2: Dependency ratio (1991-2001)

%

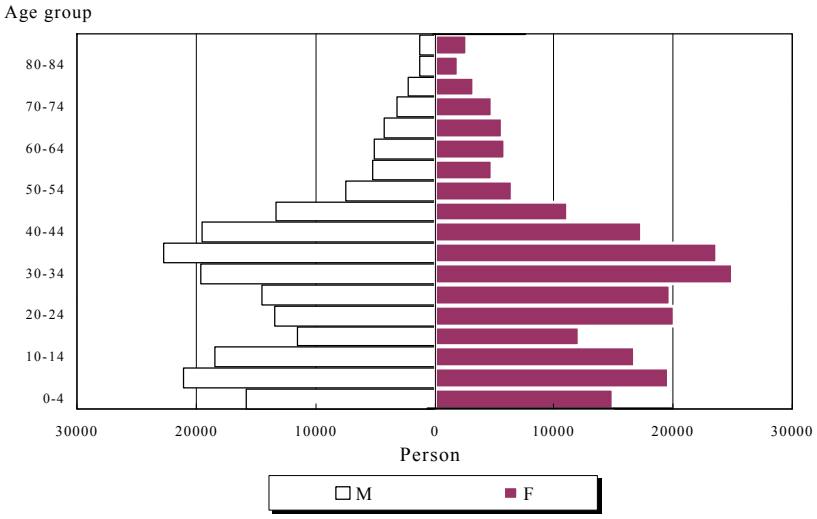

Dependency ratio [a] \ Year	1991	1996	2001
Child dependency ratio	35.7	38.2	30.5
Elderly dependency ratio	9.6	10.2	10.2
Overall dependency ratio	45.3	48.4	40.7

[a] Child dependency ratio : Proportion of residents aged 0-14 per 100 residents aged 15-64.
Elderly dependency ratio : Proportion of residents aged 65 and above per 100 residents aged 15-64.
Overall dependency ratio : Proportion of residents aged 0-14 and residents aged 65 and above per 100 residents aged 15-64.

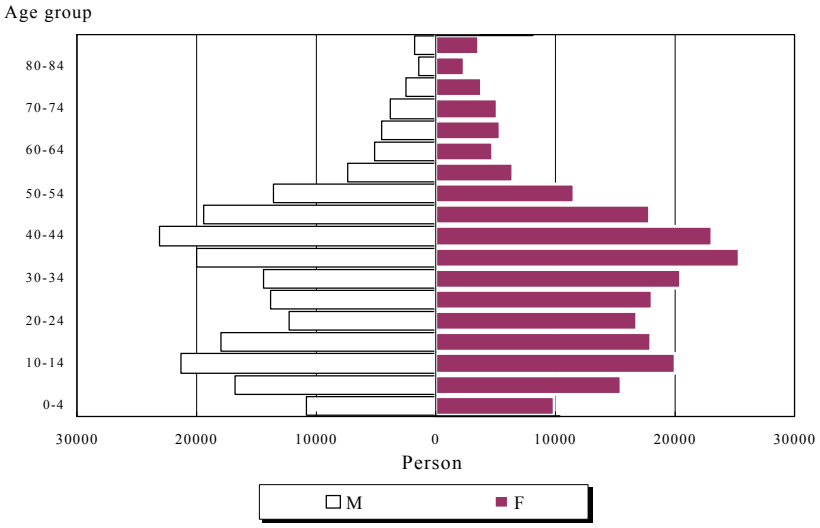

Graph 3: Population pyramid, 1991

Graph 4: Population pyramid, 1996

Graph 5: Population pyramid, 2001

1.3 Place of birth

Census 2001 showed that 206,384 (47.4%) of the resident population were born in Mainland China, of which 78.5% were born in Guangdong province and 14.9% in Fujian province. Meanwhile, 43.9% of the residents were born in Macao, 3.3% in Hong Kong Special Administrative Region (Hong Kong SAR) and 0.4% in Portugal. Compared with Census 91, the proportion of residents born in Macao increased by 3.8 percentage points, while the proportion of residents born in other places dropped, ranging from 0.1 to 2.9 percentage points.

Table 3: Resident population by place of birth (1991-2001)

%

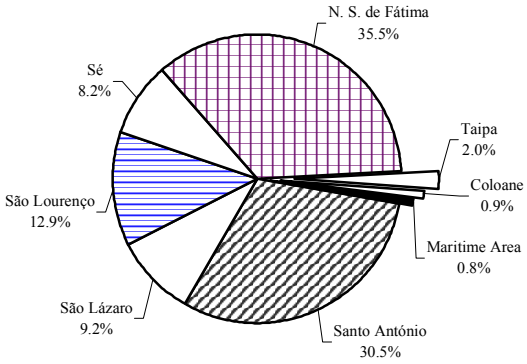

Place of birth \ Year	1991	1996	2001
Macao	40.1	44.1	43.9
Mainland China	50.3	47.1	47.4
Hong Kong SAR	3.4	3.0	3.3
Portugal	1.0	0.9	0.4
Others	5.1	4.9	5.0

Note: Due to rounding, percentages may not add up to 100%.

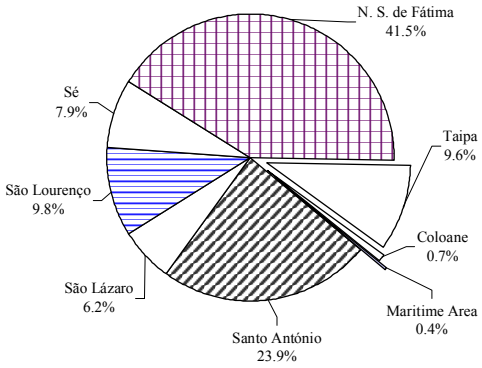

1.4 Geographical distribution

Among the different parishes, Nossa Senhora de Fátima parish had the largest share, with 180,499 residents (41.5% of the total); followed by Santo António parish (23.9%), São Lourenço parish (9.8%) and Taipa Island (9.6%). Compared with Census 91, the population in Taipa Island increased significantly by 4.8 times over the past 10 years, its proportion to the total resident population increased by 7.6 percentage points.

Graph 6: Resident population by parish (1991-2001)

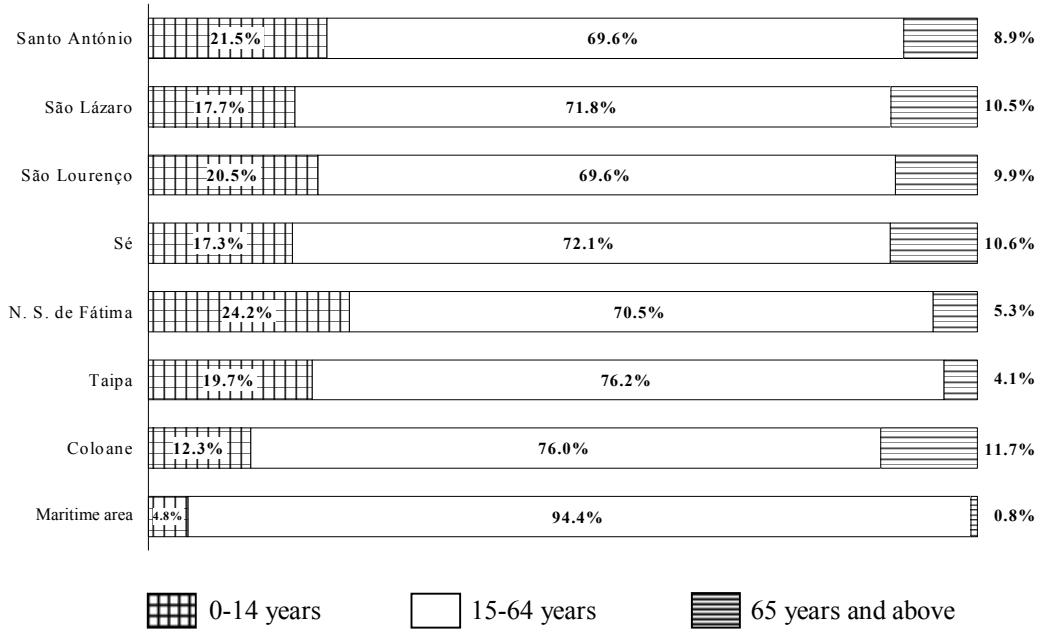

Census 91

Census 2001

Distribution of the resident population by age groups differed among parishes. Nossa Senhora de Fátima parish had the largest proportion of residents aged 0-14. For Taipa Island, its population mainly comprised of residents aged 0-14 and 15-64, while its proportion of elderly residents aged 65 and above was the lowest among all parishes (excluding maritime area). On the contrary, Coloane Island had the largest share of elderly residents, which accounted for 11.7% of its total. Meanwhile, in Sé and São Lázaro parish, the proportions of elderly residents also exceeded 10.0%.

Graph 7: Resident population by parish and age group (2001)

1.5 Population density

Census 2001 showed that the population density in Macao was 16,870 persons per km^2. Due to continual reclamation, the total area of Macao had been expanded 43.3%, from 18.0 km^2 to 25.8 km^2 over the last decade, surpassing its population growth rate. Consequently, population density decreased by 14.6% when compared with 19,761 persons per km^2 in Census 91.

Santo António parish was the most densely populated area in Macao, with 94,743 persons per km^2; followed by Nossa Senhora de Fátima parish, with 60,166 people per km^2. Compared with Census 91, population density in Taipa Island increased by 2.9 times, with 6,740 persons per km^2, while the population density was lowest in Coloane Island, with only 382 persons per km^2.

Table 4: Population density (1991-2001)

Persons / Km^2

Year / Parish	1991	1996	2001
Total	19,761	19,352	16,870
Macao Peninsula	51,127	50,119	45,723
Santo António	98,776	100,095	94,743
São Lázaro	54,370	53,582	44,857
São Lourenço	50,904	54,600	47,601
Sé	20,881	14,337	11,785
N. S. de Fátima	46,750	54,654	60,166
Taipa	1,748	3,058	6,740
Coloane	437	317	382

Note: Population density is not applicable to maritime area. Population density of Taipa and Coloane Islands excluded the Co-Tai reclamation zone.

1.6 Marine population

The marine population Census collected information from 426 vessels that berthed in Macao's custom maritime area, among which 370 vessels and 1,898 residents were enumerated. Compared with Census 91, the number of vessels and residents dropped by 161 units and 933 persons, equivalent to decreases of 30.3% and 33.0% respectively.

Among the marine population, males and females accounted for 77.1% and 22.9% respectively; besides, 94.4% of the marine population aged 15-64.

A major proportion (54.4%) of the marine population was born in Mainland China, while those born in Macao dropped by 6 percentage points compared with Census 91.

Table 5: Marine population (1991-2001)

Person

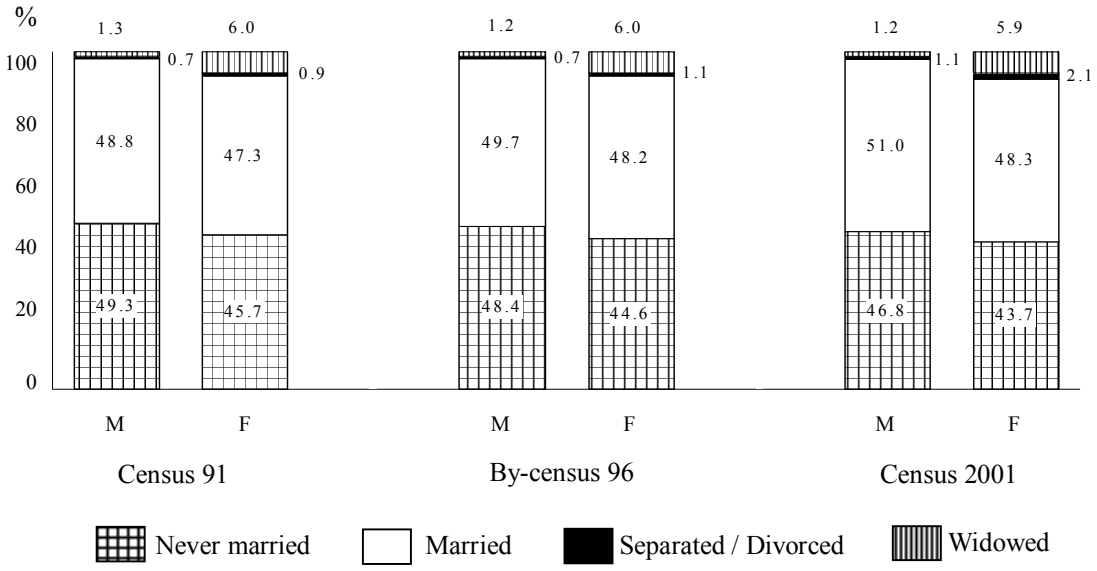

Year	1991	1996	2001
Total	2,831	2,995	1,898
Male	1,691	2,273	1,463
Female	1,140	722	435
Age group			
0-14	481	247	92
15-64	2,314	2,713	1,791
≥65	36	35	15
Place of birth			
Macao	1,107	1,063	628
Mainland China	948	1,480	1,033
Others	776	452	237

2. Other socio-demographic characteristics

2.1 Marital status

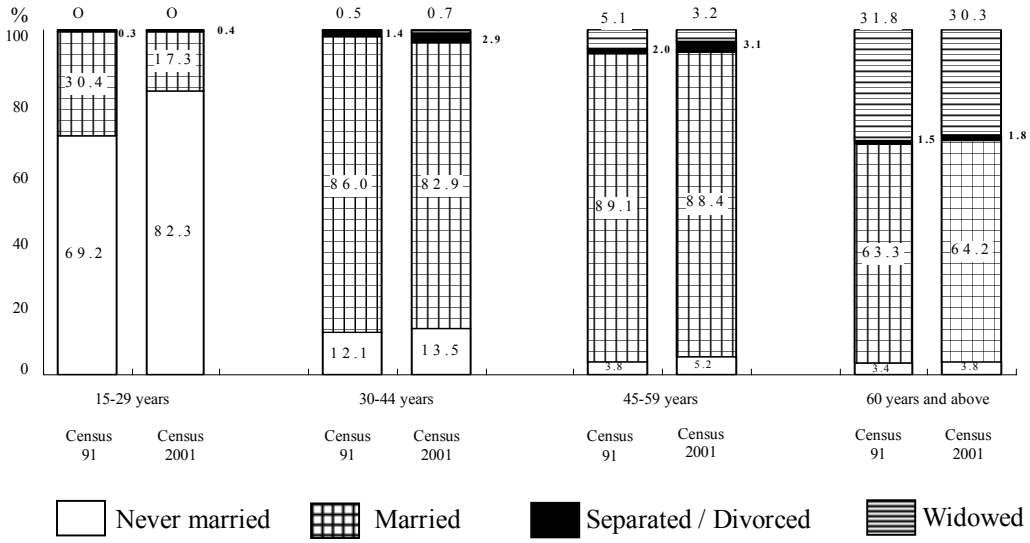

Census 2001 showed that the overall married ratio of the resident population was 49.6%, increased by 1.5 percentage points over the last Census. For the male population, 51.0% were married; for the female population, 48.3% were married. Meanwhile, the proportion of the separated/divorced was 1.6%, up 0.8 percentage point compared with Census 91.

Graph 8: Resident population by marital status (1991-2001)

An analysis by age group revealed that 88.4% of the residents aged 45-59 were married, down 0.7 percentage point compared with Census 91. On the other hand, 30.3% of the residents aged 60 and above were widowed, a decrease of 1.5 percentage point over the last 10 years. Among the population aged 15-29, 82.3% were never married, up 13.1 percentage points compared with Census 91.

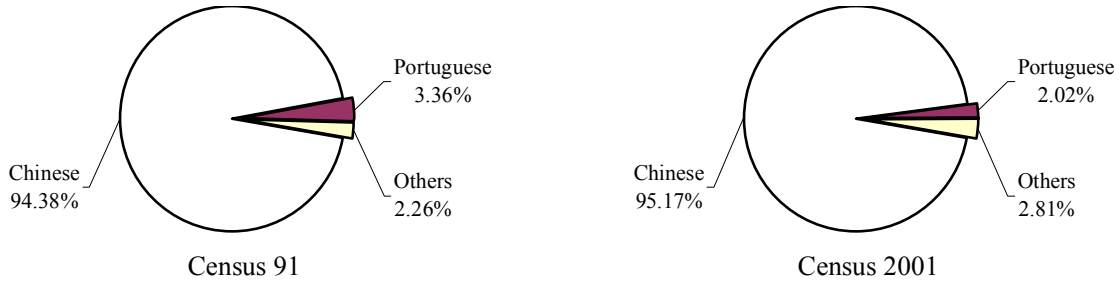

Graph 9: Resident population by age group and marital status (1991-2001)

2.2 Nationality [b]

In Macao, 95.2% of the resident population were of Chinese nationality, 2.0% of Portuguese nationality; the rest included Filipino, American/Canadian, Thai and others. In comparison with Census 91, the proportion of Chinese nationality increased by 0.8 percentage point, while the proportion of Portuguese nationality dropped by 1.3 percentage points.

Graph 10: Resident population by nationality (1991-2001)

[b] In Census 2001, classification of "nationality" was based on the "Explanation of the Standing Committee of the National People's Congress on interpreting a few questions about the application of the Nationality Law in the Macao Special Administrative Region". Using this classification, data related to nationality of Census 91 was re-compiled to facilitate statistical comparison.

2.3 Descent

Results from Census 2001 showed that 95.7% of the resident population in Macao were of Chinese descent, increased by 0.6 percentage point compared with Census 91. On the other hand, residents who were of Portuguese, Chinese/Portuguese or Chinese/Portuguese and other descent accounted for 1.8% of the total.

Table 6: Resident population by descent (1991-2001)

%

Descent \ Year	1991	2001
Chinese	95.1	95.7
Chinese and Portuguese	1.3	1.0
Chinese, Portuguese and others	0.2	0.1
Portuguese	1.5	0.6
Others	2.0	2.6
Of which: Portuguese and others	…	0.1

2.4 Total years of residence in Macao [c]

Among the land population, 39.0% of the residents were born in Macao who had never left Macao for more than six months. Besides, 56.0% of the residents were born outside Macao, among which 6.7% had resided in Macao for less than 5 years, 8.7% for 5-9 years and 28.8% for 20-24 years.

When analyzed by the place of birth of the land population born outside Macao, 84.6% were born in Mainland China. Among them, 31.3% had resided in Macao for 20-24 years. Furthermore, 30.1% of those who were born in Portugal had resided in Macao for 5-9 years.

[c] "Total years of residence in Macao" was not applicable to marine population.

Table 7: Resident population born outside Macao by total years of residence in Macao [c] (2001)

Total years of residence in Macao	No. of persons	Proportion (%)
0-4 years	40,528	16.7
5-9 years	21,220	8.7
10-14 years	32,869	13.5
15-19 years	36,701	15.1
20-24 years	70,000	28.8
25-29 years	8,468	3.5
30-39 years	12,870	5.3
40 years and above	20,170	8.3

Note : Due to rounding, percentages may not add up to 100%.

2.5 Migration

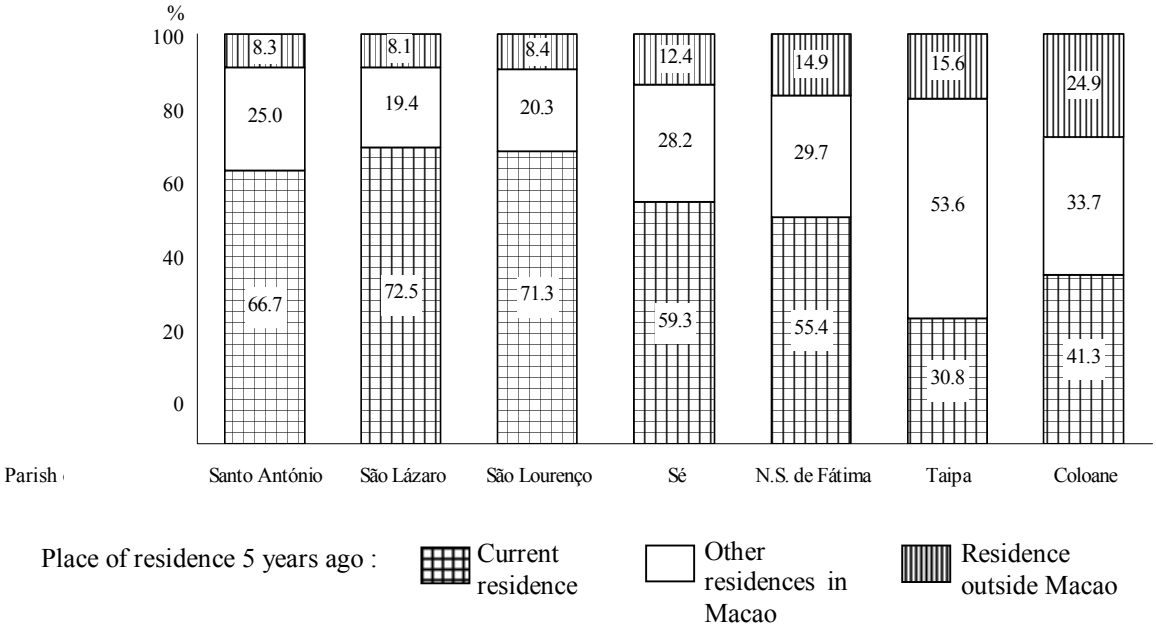

Census 2001 showed that 11.5% of the resident population had lived outside Macao 5 years ago (i.e. August 1996), whereas 73.4% had lived in Mainland China, 8.3% in Hong Kong SAR and 3.8% in Taiwan region.

The main reasons for living outside Macao 5 years ago included “not immigrated or returned to Macao” (69.4%), “working/seeking work” (16.3%) and “studying/on training” (10.1%).

Owing to immigration to Macao or internal migration, 41.3% of the residents (excluding marine population and persons born in the last 5 years) had changed their residence during the last 5 years. In Taipa Island, 60.6% of its current residents moved to the island during this 5-years period, at the same time, 8.7% had changed their residence within the island.

An analysis by parish showed that São Lázaro parish had the largest proportion (72.5%) of residents who lived in the same residence in the last 5 years; followed by São Lourenço parish (71.3%) and Nossa Senhora de Fátima parish (55.4%). For Coloane and Taipa Islands, they accounted for 41.3% and 30.8% respectively.

Graph 11: Resident population by place of residence 5 years ago and parish

Note: Excluding marine population and persons born in the past 5 years.

2.6 Usual language

Among the resident population aged 3 and above, 87.9% of them mostly spoke Cantonese at home, 1.6% spoke Mandarin, 7.6% spoke other Chinese dialects and 0.7% spoke Portuguese.

Table 8: Usual language spoken at home (1991-2001)

%

Usual language \ Year	1991	1996	2001
Cantonese	85.8	87.1	87.9
Mandarin	1.2	1.2	1.6
Other Chinese dialects (including Hokkien)	9.6	7.8	7.6
Portuguese	1.8	1.8	0.7
English	0.5	0.8	0.7
Others	1.1	1.3	1.7

Note : Due to rounding, percentages may not add up to 100%.

Apart from the usual language spoken at home, 30.6% of the resident population had the ability to speak another language and most of them could speak Mandarin (45.2%). In addition, 11.8% were able to speak two other languages, and 1.8% could speak three or more other languages. Compared with By-census 96, the proportions of residents who had the ability to speak one, two, three or more languages soared by 3.2, 3.7 and 0.6 percentage points respectively.

2.7 Education characteristics

- Educational attainment and literacy

For the residents aged 3 and above, 28.8% with no schooling or had not completed primary education, 25.8% with primary education, 22.3% with junior secondary education, 15.6% with senior secondary education and 7.4% with tertiary education.

Compared with Census 91, the proportion of residents by levels of education lower than senior secondary decreased, ranging from 0.1 to 7.1 percentage points. On the contrary, the proportion of residents with senior secondary education or tertiary education grew by 7.1 and 3.0 percentage points respectively.

For resident population aged 15 and above, the literacy rate was 91.3%.

Table 9: Resident population aged 3 and above by educational attainment (1991-2001)

%

Educational attainment \ Year	1991	1996	2001
No schooling / Pre-primary education	17.0	13.9	9.9
Primary education, incomplete	21.0	20.4	18.9
Primary education, complete	26.7	25.4	25.8
Junior secondary education	22.4	22.5	22.3
Senior secondary education	8.5	12.2	15.6
Tertiary education	4.4	5.5	7.4
Special education	-	0.1	0.1

Note : Due to rounding, percentages may not add up to 100%.

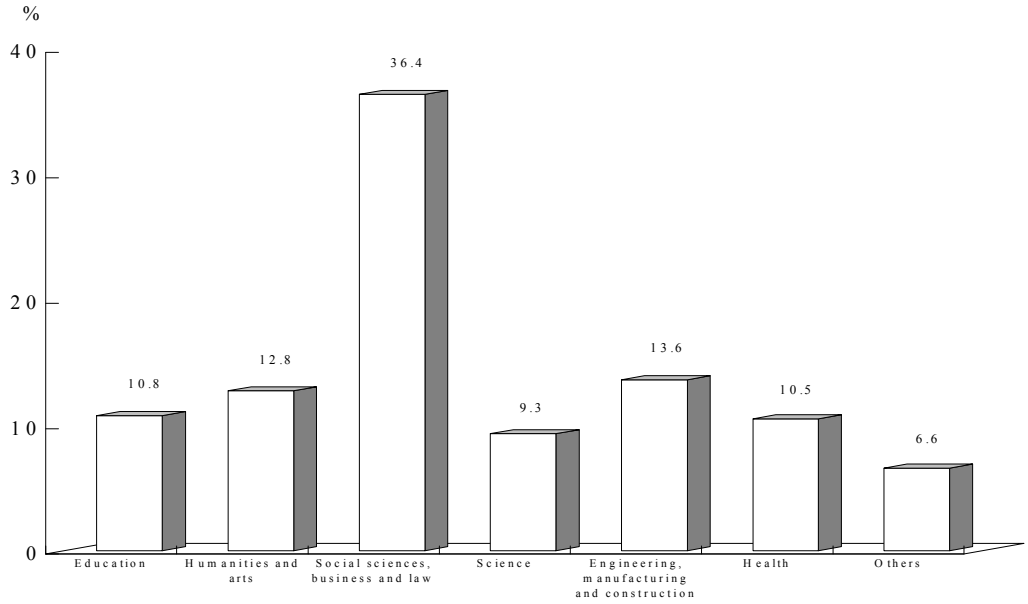

- Field of study

Among the resident population aged 3 and above, 31,425 (7.4%) had tertiary education, 76.2% were graduated with degree courses and 23.8% with non-degree courses.

The more popular field of study included ***"Social science, business and law"*** (36.4%), followed by ***"Engineering, manufacturing and architecture"*** (13.6%) and ***"Humanities and arts"*** (12.8%).

An analysis by the sex composition and field of study revealed that in ***"Education"***, 83.6% were females, while in ***"Engineering, manufacturing and architecture"***, 85.5% were males.

Graph 12: Resident population with tertiary education by field of study (2001)

In addition, among the residents with tertiary education, 34.7% obtained their qualifications from local tertiary institutions and 33.1% from Mainland China.

For those who obtained their qualifications from local tertiary institutions, the more popular field of study was ***"Social sciences, business and law"*** (44.0%), followed by ***"Education"*** (16.0%) and ***"Humanities and arts"*** (12.0%). On the other hand, for those who obtained their qualifications from Mainland China, the more popular field of study were ***"Social sciences, business and law"***, ***"Engineering, manufacturing and architecture"*** and ***"Health"***, accounted for 26.8%, 17.9% and 16.8% respectively.

- School attendance

According to the results of Census 2001, 29.8% of the residents aged 3 and above claimed that they would be attending formal education in the coming academic year, up 4.5 percentage points over Census 91. This ratio was particularly high among those aged 3-24 (80.5%), increased by 14.4 percentage points over the last Census.

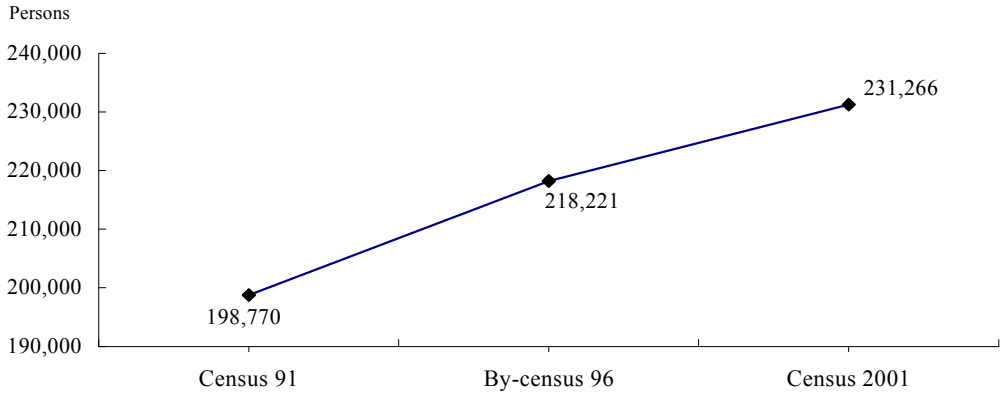

3. Economic characteristics

3.1 Economic activity status

Census 2001 showed that there were 349,745 residents aged 14 and above in late August 2001. Among the active population (labour force) of 231,266, the proportion of male and female accounted for 53.5% and 46.5% respectively. Compared with Census 91, the labour force increased by 32,496 persons (16.3%), the average annual growth rate was 1.5% over the past decade. The inactive population was 118,479, while females shared 65.5% of the total. Besides, 89.8% of the residents aged 65 and above were inactive.

In Macao Peninsula, the proportion of the labour force to the total resident population varied from 61.9% to 67.3%. In Taipa Island, it accounted for 74.0% and reached 98.3% of the marine population. On the contrary, 63.7% of the resident population in Coloane were inactive.

Graph 13: Labour Force (1991-2001)

The labour force comprised mainly of residents aged 35-39 and 40-44, which accounted for 16.0% and 16.7% of active population. The median age of the labour force rose from 32.5 in Census 91 to 37.8 in Census 2001.

According to the educational attainment, 11.9% of the labour force had no schooling or had not completed primary education, 25.4% with primary education, 28.7% with junior secondary and 34.0% with senior secondary or above. Meanwhile, the proportion of the labour force with senior secondary education and tertiary education increased by 9.9 and 5.6 percentage points respectively over Census 91.

Table 10: Labour force by educational attainment (1991-2001)

%

Year / Educational attainment	1991	1996	2001
No schooling / Pre-primary education	4.9	3.5	2.2
Primary education, incomplete	14.0	10.8	9.7
Primary education, complete	31.6	28.0	25.4
Junior secondary education	30.9	31.0	28.7
Senior secondary education	12.0	17.8	21.9
Special education	6.6	8.9	12.1

Note : Due to rounding, percentages may not add up to 100%.

3.2 Employed population

In late August 2001, the size of the employed population was 215,059, of which 52.7% were males and 47.3% were females. Compared with Census 91, the proportion of male dropped by 2.9 percentage points.

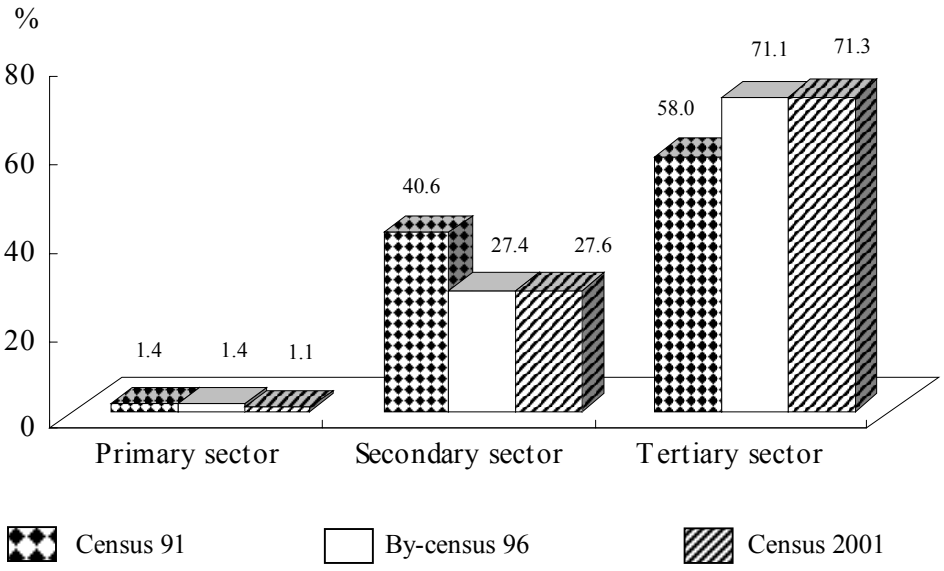

According to the status in employment, 88.7% of the employed population were "***employees***", 6.1% were "***own-account workers***" and 4.1% were ***"employers"***. Compared with By-census 96, the proportions of "***employees***" and "***own-account workers***" grew by 0.9 and 0.8 percentage point respectively, while the proportion of "***employers***" dropped by 1.4 percentage points. According to the sex composition, results showed that 83.3% of the "***employers***" were males, an equal share of 50% each for "***employees***", while 77.1% of the "***unpaid family workers***" were females.

- Industry and occupation

With regard to the distribution of employed population by industry, ***"Manufacturing"*** took up 19.8% of the total, followed by ***"Wholesale and retail trade, repair of motor vehicles, motorcycles and personal and household goods"*** (15.1%) and ***"Other community, social and personal services"*** (11.6%).

When analyzed by principal industrial sectors, the primary sector (fishing and agriculture) shared only 1.1% of the employed population. At the same time, 27.6% were working in the secondary sector (manufacturing, construction and others) and 71.3% in tertiary sector (wholesale and retail trade, restaurant, tourism, gambling, financial activities and others). Compared with Census 91, the proportion of employed population in the secondary sector dropped by 13.0 percentage points, while the tertiary sector increased by 13.3 percentage points.

Graph 14: Employed population by principal industrial sector (1991-2001)

According to the occupational distribution of the employed population, 19.8% were ***"Service and sales workers"***, 18.5% were ***"Clerks"*** and 16.5% were ***"Unskilled workers"***. Compared with Census 91, the first two categories increased by 6.8 and 4.1 percentage points, while the proportion of ***"Unskilled workers"*** dropped by 3.0 percentage points.

Table 11: Employed population by occupation (1991-2001)

%

Occupation \ Year		1991	1996	2001
Group 1 -	Legislators, senior officials of government and associations, directors and managers of companies	9.0	7.3	6.5
Group 2 -	Professionals	1.6	2.7	3.3
Group 3 -	Technicians and associate professionals	6.6	8.7	9.6
Group 4 -	Clerks	14.4	17.3	18.5
Group 5 -	Service and sales workers	13.1	18.6	19.8
Group 6 -	Skilled workers of agriculture and fishery	1.5	1.5	1.2
Group 7 -	Craft and similar workers	15.0	14.6	12.1
Group 8 -	Plant and machine operators, drivers and assemblers	19.4	13.6	12.5
Group 9 -	Unskilled workers	19.5	15.6	16.5

Note : Due to rounding, percentages may not add up to 100%.

- Employment earnings

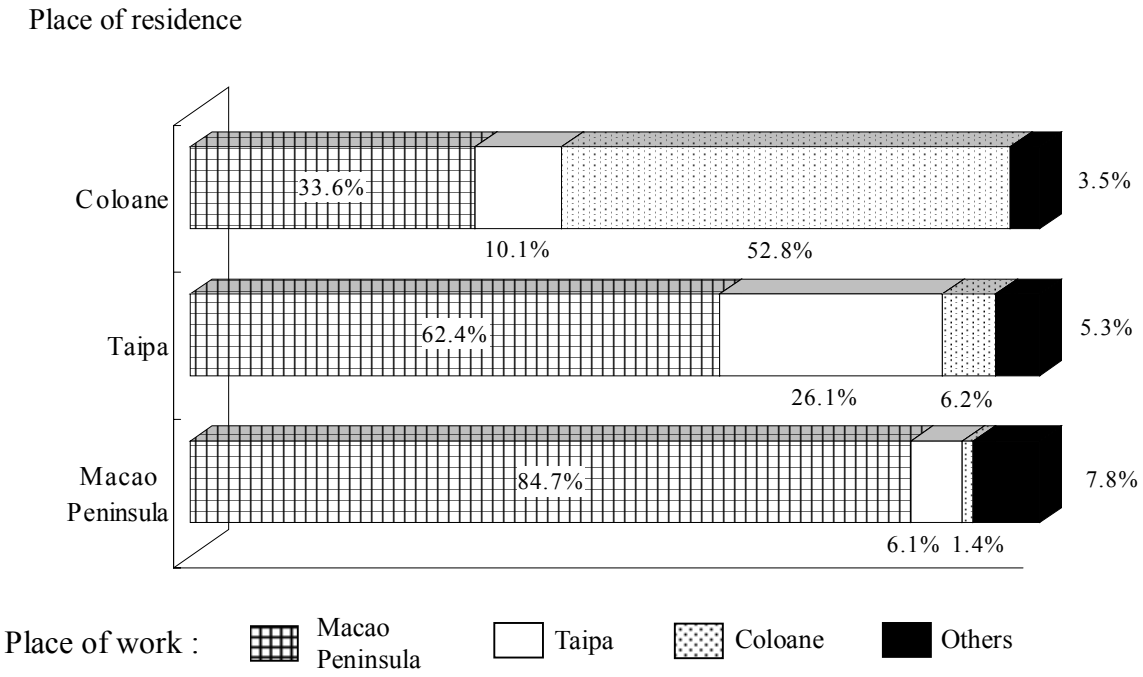

Census 2001 showed that the median earnings from "main employment" and "all employment" in July 2001, were MOP5,110 and MOP5,144 respectively. ***"Manufacturing"***, which shared the largest proportion of the employed population, the median earnings from main employment was MOP3,212. For the ***"Service and sales workers"***, the leading occupation among the employed population, the median earnings from main employment was MOP4,927.

- Place of work

Among the employed population, 81.3% of them worked in Macao Peninsula, 8.3% in Taipa Island, 2.1% in Coloane Island, and 3.8% in Mainland China, Taiwan region and others.

For the employed population who lived in Macao Peninsula, 6.1% worked in Taipa Island and 1.4% in Coloane Island. On the other hand, 62.4% and 33.6% of those living in Taipa and Coloane Islands worked in Macao Peninsula.

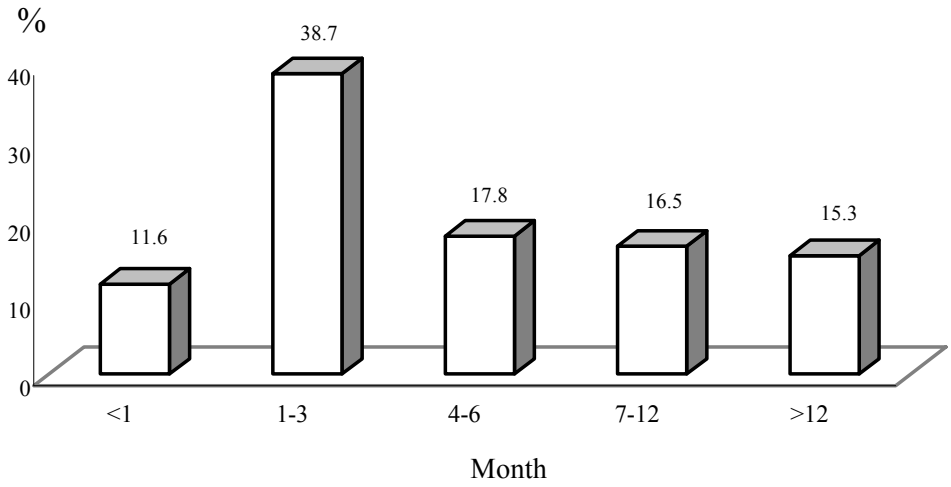

Graph 15: Employed population by place of work (2001)

3.3 Unemployed population

In late August 2001, the size of the unemployed population was 16,207, of which male and female accounted for 62.8% and 37.2% respectively. Among the unemployed, 13.7% were looking for the first job and 86.3% were searching for a new job. Most of the unemployed (38.7%) spent 1-3 months looking for jobs. When analyzed by their educational attainment, 76.4% of them had junior secondary education or lower levels.

Graph 16: Unemployed population by job search duration (2001)

4. Population with disability

For the first time in Macao, Census 2001 collected information on the population with physical and/or mental disability from the households. Based on the information provided, the size of the population with disability was 5,713, corresponding to 1.3% of the resident population. Among them, 51.1% were male and 48.9% were female. An analysis by age group showed that the disabled accounted for 0.5% of the population aged 14 and below, 1.0% of those aged 15-64 and 6.7% of those aged 65 and above.

Results also showed that 84.1% of the disabled had one disability, 14.0% had two and 2.0% had three or more disabilities. For those who had one disability, 34.0% had ***"Impaired limbs or trunk"***, 18.1% had ***"Psychiatric conditions"***, 11.9% had ***"Vision disorder"*** and 11.3% had ***"Mental retardation"***. For those who had two disabilities, 50.4% had ***"Speech disorder"***, for those who had three or more disabilities, 69.4% had ***"Speech disorder"***.

Most of the disabled (83.5%) lived in domestic living quarters and 16.5% lived in collective living quarters such as institutions. Among those who lived in domestic living quarters, 88.1% lived with other household members and 11.9% lived alone.

According to the information of the disabled interviewed, 63.7% claimed they had used the services catered for the disabled. For those who had "***Psychiatric conditions***", 83.9% answered that they had used these service, followed by those who had "***Psychiatric conditions***" (76.4%), and those who had ***"Hearing impairment"*** (52.7%).

When analyzed by the type of living quarters, 81.8% of the disabled who lived in collective living quarters or institutions reported that they had used the services catered for the disabled. For those who lived in domestic living quarters, the proportion was only 44.5%.

Table 12: Population with disability by type of living quarter and utilization of services catered for the disabled

Living quarter	Population with disability		Proportion of using services catered for the disabled
	Total	Proportion	
Total	5,713	100.0%	63.7%
Domestic living quarters	4,771	83.5%	44.5%
of which: one-person households	678	(11.9%)	
Collective living quarters	942	16.5%	81.8%

II. Household and housing

5. Household [d]

5.1 Household size

Taking into account that a household ought to have at least a member of the resident population, there were 134,965 households in Macao. Households with fewer than four persons constituted 55.6% of the total, up 3.7 percentage points from 51.9% in Census 91. The average household size decreased by 0.35 person, from 3.49 persons in 1991 to 3.14 persons, indicating a trend towards smaller household.

5.2 Household composition

Based on the relationship among household members, households can be categorized into three types of household composition: ***"One-person household"***, ***"Nuclear household"*** and ***"No nuclear household"***.

"One-person household", formed by only one household member, accounted for 17.1% of all households in Macao.

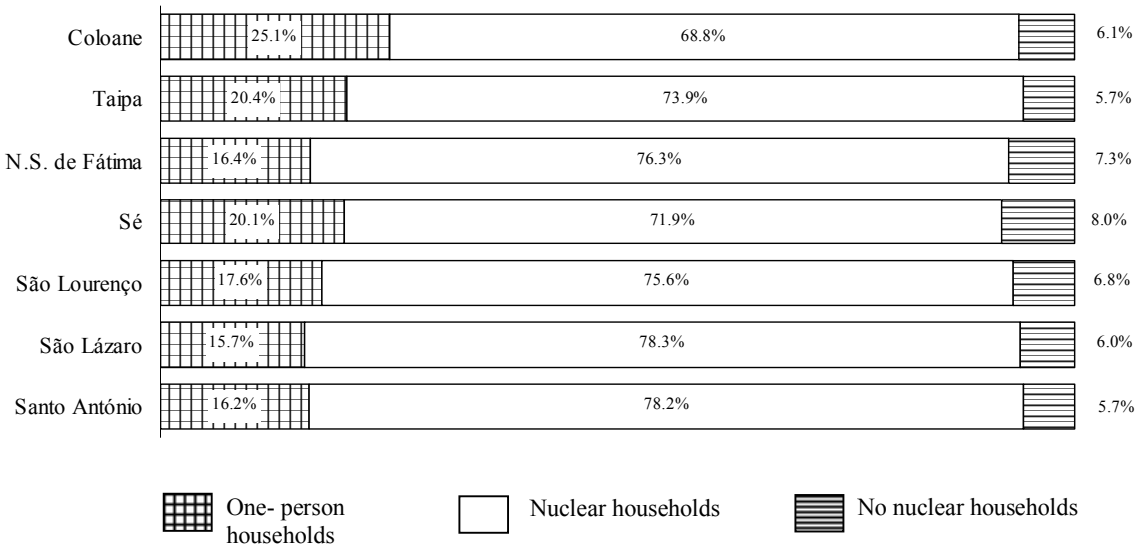

A family nucleus can be formed by a couple or a single parent with never married children. ***"Nuclear household"*** refers to a household with one or more family nuclei. In Macao, 76.2% of the households were ***"Nuclear households"***, among them, 96.5% consisted of only one family nucleus and 3.5% consisted of two or more family nuclei.

"No nuclear household" refers to a household with two or more members who do not form a family nucleus. In Macao, 6.7% of the households were ***"No nuclear households"***, of which 47.0% were formed by unrelated persons.

[d] Excluding collective living quarters.

An analysis of the household composition by parish (excluding maritime area) revealed that Coloane Island had the highest proportion of ***"One-person household"*** (25.1%) and São Lázaro parish had the highest proportion of ***"Nuclear household"*** (78.3%).

Graph 17: Household compositions by parish (2001)

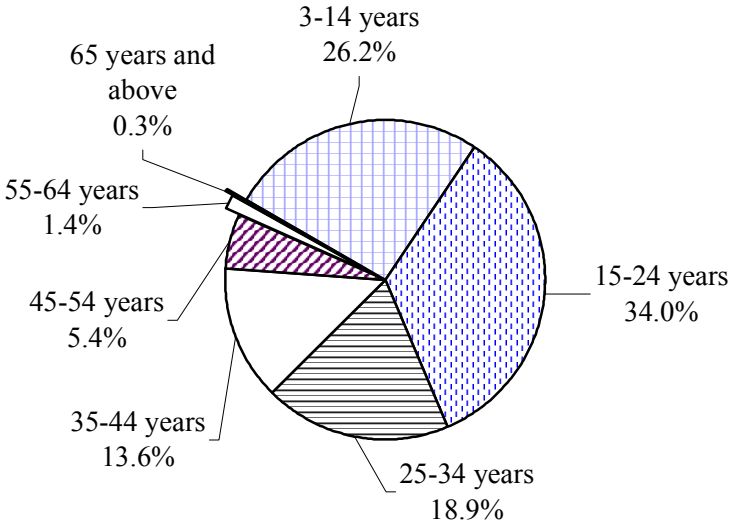

5.3 Computer usage [e]

In Macao, 44.9% of the households had computers at home. Out of those who had used computers at home during the last 3 months, 69.5% of them had logged onto the Internet.

There were 103,580 computer users aged 3 and above, which accounted for 24.5% of the total resident population in this age group; at the same time, most of computer users aged 15-24, equivalent to 34.0% of the total users.

[e] Not applicable to mobile living quarters, living quarters not elsewhere classified and collective living quarters.

Graph 18: Computer users aged 3 and above by age group (2001)

When analyzed by the educational attainment of the computer users, 25.4% with junior secondary education, 20.1% with senior secondary education and 17.0% with tertiary education.

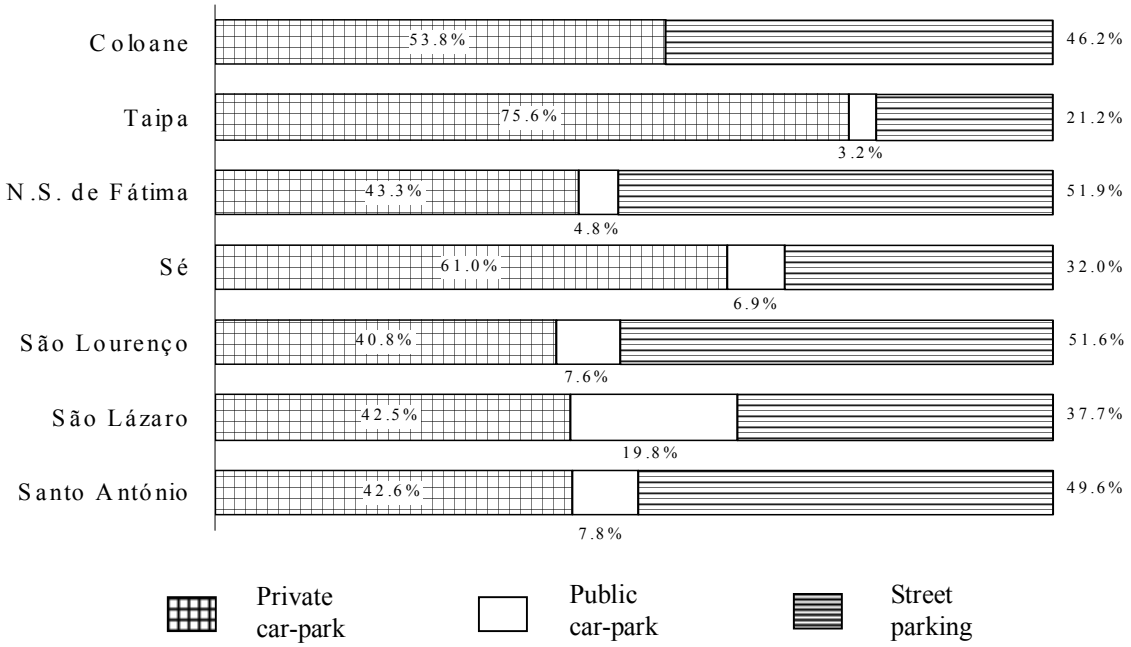

5.4 Possession of motor vehicles [f]

In Macao, 44.4% of the households had motorcycles or automobiles, among them, 69.2% had motorcycles and 56.4% had automobiles.

For those households who possessed automobiles, 53.4% parked their cars in private car-parks at night and 39.8% parked in the street. An analysis by parish showed that 51.9% of the households in Nossa Senhora de Fátima parish parked their cars in the street, while in Taipa Island, 75.6% of the households parked in private car-parks.

[f] Not applicable to mobile living quarters, living quarters not elsewhere classified and collective living quarters.

Graph 19: Night-time parking spots by parish (2001)

6. Housing

Census 2001 enumerated over 210,000 housing units, including 176,143 living quarters and 36,359 units for other purposes.

When analyzed by parish, Nossa Senhora de Fátima parish and Santo António parish had the largest numbers of living quarters. Meanwhile, Taipa Island had the highest proportion of living quarters (92.4%) and Sé parish had the lowest proportion (58.9%).

6.1 Occupancy of housing units

In Census 2001, 176,143 living quarters were enumerated, of which 142,393 units were occupied. Among them, 141,672 were domestic living quarters, the remaining 721 were collective living quarters such as hotels, elderly homes and institutions.

An analysis by parish showed that Coloane Island had the highest proportion of vacant living quarters, which accounted for 41.9% of its total; on the contrary, Nossa Senhora de Fátima parish had the lowest proportion, with only 14.7%.

Table 13: Occupancy of housing units (2001)

No.

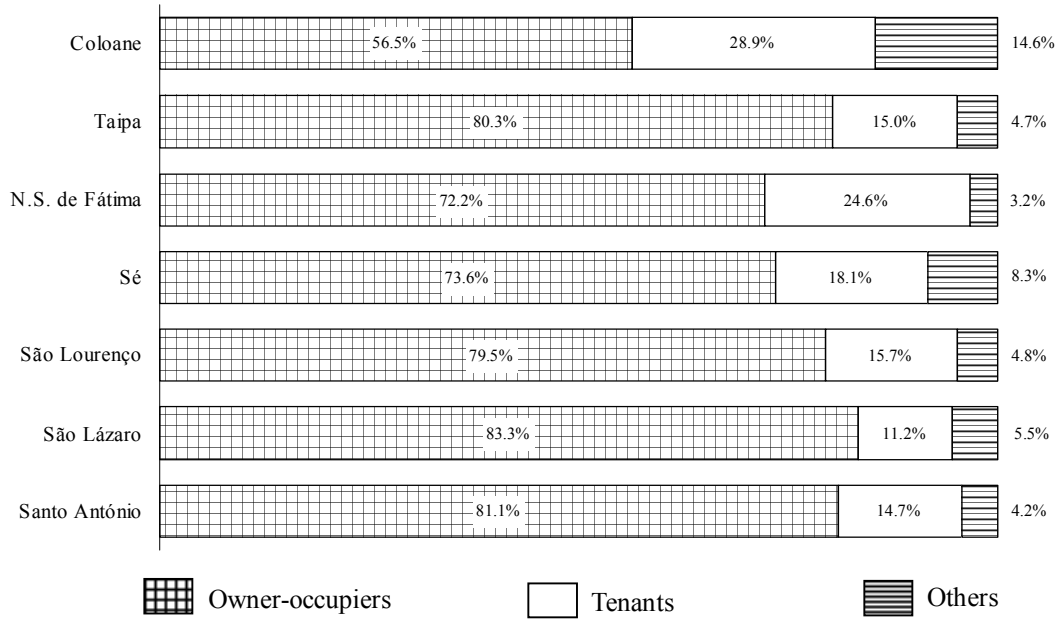

Parish	Total	Living quarters			Units for other purposes		
		Sub-total	occupied	vacant	Sub-total	occupied	Vacant
Total	212,502	176,143	*142,393*	*33,750*	36,359	*18,770*	*17,589*
Santo António	48,067	40,163	*33,851*	*6,312*	7,904	*5,140*	*2,764*
São Lázaro	13,670	11,838	*9,455*	*2,383*	1,832	*1,119*	*713*
São Lourenço	21,580	17,931	*14,548*	*3,383*	3,649	*2,093*	*1,556*
Sé	30,430	17,911	*11,844*	*6,067*	12,519	*4,019*	*8,500*
Nossa Senhora de Fátima	73,940	65,453	*55,848*	*9,605*	8,487	*5,443*	*3,044*
Taipa	22,797	21,066	*15,644*	*5,422*	1,731	*765*	*966*
Coloane	1,592	1,380	*802*	*578*	212	*166*	*46*
Maritime area	426	401	*401*	-	25	*25*	-

6.2 Tenure of living quarters [g]

Among 134,965 households in Macao, 76.5% were owner-occupier of their living quarters, 18.9% were tenants and 4.6% stayed in living quarters provided by employers, rent free or other situations. Compared with Census 91, the proportion of owner-occupiers increased by 10.6 percentage points, while the proportion of tenants dropped by 8.9 percentage points.

Furthermore, results showed that São Lázaro parish had the highest proportion of owner-occupiers (83.3%), while Coloane Island had the highest proportion of tenants (28.9%).

Graph 20: Tenure of living quarters by parish (2001)

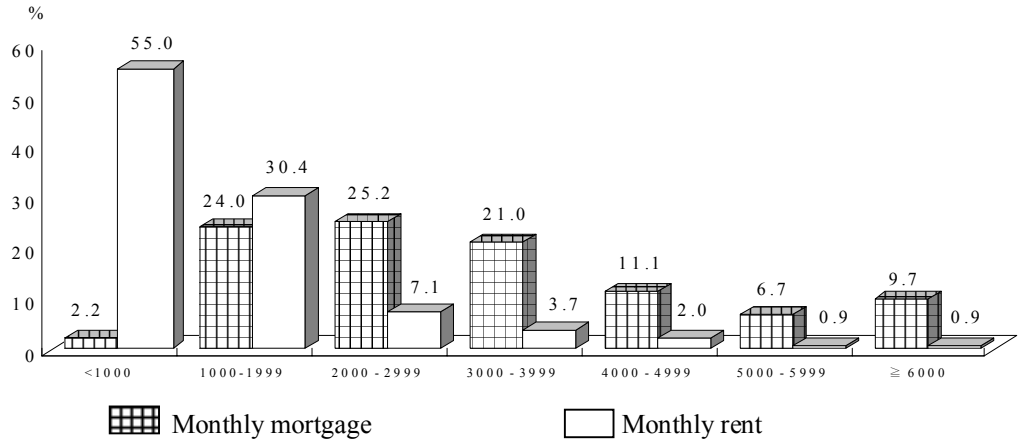

[g] Excluding collective living quarters.

6.3. Rent and mortgage [h]

Among the owner-occupiers, 38.1% had to pay monthly mortgage. When analyzed by the amount of monthly mortgage payment, 25.2% paid MOP2,000-2,999 and 21.0% paid MOP3,000-3,999; meanwhile, the median monthly mortgage payment was MOP2,800.

With regard to the monthly rent payment, 55.0% of the households paid less than MOP1,000 and 30.4% paid MOP1,000-1,999; the median monthly rent payment was MOP800.

Graph 21: Monthly rent and mortgage payments (2001)

When analyzed by the number of rooms, 61.7% of the conventional living quarters consisted of 3 rooms. Compared with Census 91, conventional living quarters with 3 or more rooms increased by 4.1 percentage points.

[h] Not applicable to mobile living quarters, living quarters not elsewhere classified and collective living quarters.

[a] Criteria for classification of population by nationality were in accordance with the "Explanation of the National People's Congress on interpreting a few questions about the application of the Nationality Law in the Macao Special Administrative Region". The same criteria were used to recalculate results from Census 91 on the same subject in order to facilitate statistical comparison.

[b] Excluding maritime population.

[c] Resident population aged 3 and above.

[d] Data collected for Census 91 were based upon the registry of living quarters of the Statistics and Census Service. Census 2001 covered all housing units (for domestic living and other purposes).

[e] The figures only refer to living quarters occupied by households as main residence in Macao.

[f] Due to rounding, differences (in percentage points) between the reference periods may not be identical to the subtractions of the corresponding percentages stated in the table.
